

CALCULATE YOUR MONTHLY WATER BUDGET

To help you better understand the tiered structure, you can use this worksheet to see how many gallons are allowed each month.

How big is your lot? _____

OUTDOOR BUDGET

0 - 5000 square feet of your lot _____ x 19 = _____ A

5001-14000 square feet of your lot _____ x 17 = _____ B

Remaining square footage above 14000 square feet _____ x 14 = _____ C

Now Add A+B+C= _____ This number is your TOB (Total Outside Budget)

To calculate on a seasonal basis:

January Budget .03 X TOB = _____ February Budget .04 X TOB = _____

March Budget .07 X TOB = _____ April Budget .09 X TOB = _____

May Budget .11 X TOB = _____ June Budget .13 X TOB = _____

July Budget .15 X TOB = _____ August Budget .14 X TOB = _____

September Budget .10 X TOB = _____ October Budget .07 X TOB = _____

November Budget .04 X TOB = _____ December Budget .03 X TOB = _____

INSIDE BUDGET

Please refer to the total number of residents from above. Is this number greater than 3?

NO, you will receive 4,200 gallons of water a month for inside usage.

YES, for every occupant above the original 3 add an additional 1,000 gallons to 4,200 gallons and then multiply by 12. This will be your **annual** indoor budget.

Total number of occupants (_____ - 3) X 1,000 = _____ + 4,200 = _____ which will be your monthly water budgeted for inside usage. This amount will not change by month.

If you have more than 3 full time residents living in your home and would like to receive an increased allotment of water please complete a Water Budget Adjustment Application. If you have already done so and have been approved the adjustment has been added to your account information already.
